1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 29-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Debe. Debe discloses the claimed invention at col. 12, lines 34-45, and col. 23, lines 1-25, where two sensors, having aligned conductive regions 16, see Fig. 1, comprise an array, and the calibration table is the known sensor array response profile. The integrated circuitry and multiplexed array constitute the computer, since computer logic is necessarily involved in the comparison. . For claim 30, see col. 8, lines 50-65, where the metal coatings thereat comprise the claimed elements as coated on the whiskers to form aligned regions. For claim 31, see insulating region 12, a polymer disclosed at col. 5, lines 63-68.

3. Applicant's arguments filed 1/15/03 have been fully considered but they are persuasive only as to the allowed claims. The arguments are not germane to the claims above since those claims do not have the limitation of "wherein said aligned conductive material comprises aligned distinct particles" argued. As to aligned, the whisker of Debe is a line of conductive material, or aligned conductive material, meeting claim 29. As to Lewis, Lewis does not teach aligned particles. Further, it appears that contrary to earlier indications by the examiner, Lewis is not

prior art since applicant claims priority to December 1, 1998 based on a US application, so that the January 7, 1999 publication date of Lewis et al. renders it not prior art.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl Easthom whose telephone number is (703)308-3306. The examiner can normally be reached on M-Th. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin Enad, can be reached on (703)308-7619. The fax phone number for the organization where this application or proceeding is assigned is (703)308-7722. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
